Served stats

Rendered 2026-10-15 17:41 UTC from stats/*.json, the ledger every harness run and harness export adds to (python3 -m harness stats renders it again). Aggregate tok/s, greedy, 256-token replies, the recipe's own ruler; engine rounds from the server's own counters.

Overview: by model and hardware

Aggregate tok/s as prose/code/structured/list; first token in seconds (one stream / the most streams).

model	hardware	one stream	most streams: total	first token (s)	suite	measured
GLM-5.3-Flash, EXL3 4 bpw	2x NVIDIA DGX Spark (GB10, 128 GB unified each), TP=2 over RoCE	46/69/57/59	0.18 /	tools 59/60, json 30/30, gsm8k 246/250, humaneval 159/164, ifeval 118/150	2026-10-14
